

"Your Peace of Mind at Sea"

welcome note

yachtWORKS®, your Peace of Mind at Sea.

Two partners, two yachting enthusiasts... The **yachtWORKS®** concept was conceived more than twenty years ago - at a time when one of us was sailing a small sailing boat through bleak North Atlantic waters and the other was keeping up the sailing fleet of the Navy.

The concept was, and remains, simple: Services provided FOR sailors BY sailors; high standards of professionalism; quality services to discerning clients, who value their safety and care for their assets; a one-stop service, big enough to solve problems but still retain the personal touch; the dedication to build and guard a sterling reputation. One point of contact, one contract, a total solution, all under one roof.

Yet while simple, the concept remains virtually unique and today, **yachtWORKS®** remains one of the few businesses where clients can expect a friendly welcome, clearly explained quotations without any obligation, a job carried out to the highest standards, followed through to timely completion and accompanied by a proper warranty - all at a reasonable price.

Our 1000 square metre under-cover facility in Didim Marina offers a controlled environment, and is an integral part of the most comprehensive yachting operation in the Eastern Mediterranean. We can now handle the most demanding rebuilding projects more swiftly and effectively than ever before.

Our base in Göcek, at the heart of the motoryacht cruising area, remains geared to ensure that the cruising season is uninterrupted by unwanted breakdowns.

Turgutreis, near Bodrum, is our main hub. Alongside our service facilities here, we offer a well-stocked chandlery and our staff are committed to researching and obtaining any spares or replacements, however specialised or critical, as required.

Our powerful, transportable Fast Intervention Vessel is designed for the fastest possible response at short notice and can respond to your situation, wherever you are in our waters.

Come and meet us at one of our facilities - talk to us about your requirements, contact our references, or simply visit our website for some interesting insights.

Whatever your needs, we welcome you to the sparkling seas and coasts of the Aegean and wish you fair winds and safe passage.
